

Balloon Stamping Earth Day Craft For Kids

You Need

- Balloons
- Card Stock Paper or Computer Paper
- Green Paint
- Blue Paint

****If you don't have paint I have attached MAKE YOUR OWN PAINT PDF to this email**

LET'S BEGIN

To begin you'll want to blow up your balloon and tie it.

Don't blow up your balloon all the way you want to be able to grab the balloon.

Then squirt some of your green paint and your blue paint onto a paper plate, this way it's easy clean up.

Then as they take the balloon and stamp it onto the card stock paper the colors start to swirl together.

Another fun way to do this craft is to add different colors and create the whole solar system using balloon stamping!
