

# HOW TO MAKE PERSONALIZED COLORING PAGES FOR YOUR KIDS

You can take any photo and turn it into a coloring page for your kids. It's awesome!

Not only are these pages fun to color, they're also great for painting, too!

TURN A PHOTO INTO  
A COLORING PAGE

**Personalized coloring pages from a favorite photo are extremely easy to make** using Adobe Photoshop Elements.

Here is the website where the woman walks you through on how to change your picture.

<https://www.itsalwaysautumn.com/make-personalized-coloring-pages-kids.html>

If you don't have Adobe Photoshop elements you can use your phone editor or you can change the coloring of the picture in Microsoft word. I have examples of both.

This is to help change the coloring in Microsoft.

<https://support.office.com/en-us/article/reduce-a-color-picture-to-shades-of-a-single-color-5b33a62b-76e8-4d25-95a0-b57648b38a9e>

This could be a really fun project because it could be a picture of themselves, kids are always motivated if it is a picture of them! Have your child dress up in a costume and take a picture or use a picture you really love of your family. Just print it out, have your child color or paint it (you know it will be beautiful) and you can frame it and remember quarantine forever!

Here are my two examples: Me and my nephew!! I suggest no black plants when taking the picture. First is from my phone: A lot of gray but you can still color it with crayon or water color.

And here is with Microsoft : you can see it is more black and white, not as much details but more like real coloring pictures.
